Investment
From The Top!"*

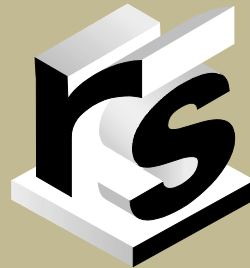

- ✓ We Self Perform Our Work
- ✓ Experienced Sales & Service Technicians
- ✓ Daytime Routes
- ✓ Fully Equipped Vehicles

FOLLOW THESE 3 EASY STEPS TO GET YOUR RESTAURANT TENANT IN COMPLIANCE

- 1 Call your sales representative from Rooftop Solutions to get started.
- 2 Educate Your Restaurant Tenants. Your sales representative will direct you to our brochures and sample letters so you can provide your tenants with exactly what they need - whether they have no grease protection or have a Grease Guard® system, without a maintenance program.
- 3 Rooftop Surveys. The best way possible in knowing the condition of your tenants' rooftop is to complete a survey, including photographs. Your sales representative will give you everything you need to complete this.

To obtain your FREE How-To Kit, please call our office today at 1-800-913-7034.

By Rooftop Solutions, exclusive manufacturer of the G2® Grease Guard®

EPA/STORM WATER VIOLATIONS

Rainwater carries the pollutants that are discharged by your rooftop exhaust fans through your drains and in the storm water system, contaminating the water supply.

OSHA VIOLATIONS

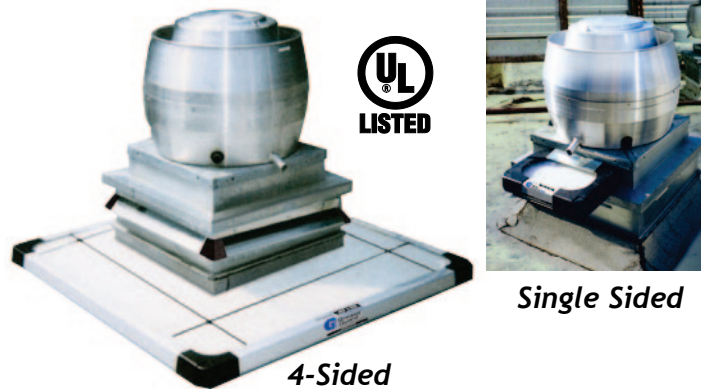

Grease spills provide fire hazards and unsafe working conditions. Poor conditions and standards result in OSHA liability claims and costly fines.

Menu

- Roof Repairs/Voided Warranties.. \$75,000
- EPA Non-Compliance \$250,000
- OSHA Liability Claims \$1,000,000
- Severe Fire Hazards..... TOTAL LOSS

YOU HAVE A PROBLEM!

WE HAVE THE SOLUTION!

The G2[®] Grease Guard[®] Rooftop Defense Systems[®] are so effective at containing grease and oils from rooftop exhaust systems that Underwriters Laboratories Inc. has Listed it for effectiveness and safety. This is the most oil absorbent, rainproof, noncombustible, grease containment system on the market today.

COSTLY ROOF REPAIRS

Grease and oil emitted onto your rooftops from your kitchen exhaust fans result in unnecessary roof leaks, costly roof repairs and unsafe work areas.

SEVERE FIRE HAZARDS

Over 11,000 structure fires are reported annually in eating and drinking establishments. Over 98% are due in part to kitchen exhaust grease and oil.
