PROTECT YOUR INVESTMENT FROM THE TOP

Why you need a Grease Guard:

-  Prevent Fire Hazards
-  Reduce Storm Drain Pollution
-  Protect Against Roof Damage
-  Help Comply with OSHA/EPA/NFPA
-  Avoid Liability Claims
-  Prevent Workman's Comp Claims
-  Safeguard Slip/Fall Accidents
-  AND MORE....

POTENTIALLY SAVING YOU THOUSANDS OF DOLLARS!

Grease Guard® Rooftop Defense Systems® are rooftop grease containment systems that are installed around fat, grease, oil, & chemical producing exhaust fans and ventilation equipment to collect fats, oils, greases, and other chemicals to effectively prevent them from damaging rooftops, providing fuel to fire, and polluting our water supplies amongst other benefits.

The Grease Guard® Advanced Filter Composite® or AFC is patented technology that traps fats, oils, greases, and chemicals in ALL weather conditions effectively keeping your roofing investments secure.

The Grease Guard is completely stand alone, does not attach to the roof, and does not interfere with exhaust equipment operations. It is the most efficient method of containing rooftop pollutants on the market today!
